DETAILED ACTION

Objection to claim 22 will not be maintained in light of amendment filed 11/8/06.

Applicant has deleted numerical references to device parts in the claims.

Applicant's arguments, see paper, filed 11/8/05, with respect to claim 22 have been fully considered and are persuasive. The objection of record has been withdrawn. See reason above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mizzi (US 4147284; 4/3/79). Mizzi teaches a two-part aerosol dispenser comprising a nozzle, pressure chamber (cylinder), needle and pump. See column 2 line 40 – column 3 line 45, claim 1. Mizzi does not teach or suggest the instant ratio of injection time to stop time. However, in a claim to a device parts to the device are essential not the instant ratio of injection time to stop time.
